Fabrikamızda, 5-15-30-45 radiuslu bıçaklarla 16 mm kalınlık ve 10 metre uzunluğa kadar abkant pres büküm yapılmaktadır. ST37, ST52, S700, S960 ve Hardox 450 gibi malzemelerde, 1 mm'den 30 mm'ye kadar hassas büküm hizmeti sunulmaktadır. Gelişmiş teknolojimiz, farklı kalınlıklarda yüksek kalite ve dayanıklılık sağlar.

In our factory, press bending is performed with 5-15-30-45 radius blades, handling thicknesses of up to 16 mm and lengths of up to 10 meters. We offer precision bending services for materials such as ST37, ST52, S700, S960 and Hardox450 from 1 mm to 30 mm. Our advanced technology ensures high quality and durability across various thicknesses.

Fabrikamızda, 12 kW ve 20 kW yüksek kesim hassasiyetine sahip fiber lazer teknolojisi ile 1 mm'den 50 mm'ye kadar çeşitli kalınlıklarda lazer kesim hizmeti sunulmaktadır. 2000x6000 mm ve 12000x3000 mm boyutlarındaki tam kesim alanlarımızda, lazerle metal kesimi işlemlerinde üstün hassasiyet ve minimum fire garantisi elde edilir.

In our factory, we offer laser cutting services for various thicknesses from 1 mm to 50 mm using 12 kW and 20 Kw fiber laser technology, providing high cutting precision. In our full cutting areas of 2000x6000 mm and 12000x3000 mm, we achieve exceptional precision and guarantee minimal waste in laser metal cutting operations.

Fabrikamızda, oksijen kesim teknolojileri kullanılarak 1 mm'den 300 mm'e kadar hassas kesimler yapılmaktadır. Fabrikamızda boru & profil lazer teknolojileri kullanılarak 230 mm genişlik ve 12 mm kalınlığa kadar boru ve profiller, yüksek hassasiyetle kesilirken, minimum fire avantajı sunulmaktadır. Oksijen kesim, özellikle kalın malzemelerde etkin çözüm sunarken, lazer kesim boru ve profil işlemleri için ideal bir teknoloji olarak öne çıkmaktadır.

In our factory, precision cuts are made using oxygen cutting technologies, ranging from 1 mm to 300 mm. In our factory, pipe and profile cutting is performed using laser technologies, achieving high precision for pipes and profiles up to 230 mm in width and 12 mm in thickness, while offering the advantage of minimal waste. Oxygen cutting is particularly effective for thick materials, while laser cutting emerges as an ideal technology for pipe and profile applications.

STRENGTH IN BENDING PRECISION CUTTING

ACR Metal, lazer kesim ve abkant pres sektöründe uzun yıllara dayanan tecrübesi ve uzman kadrosuyla, müşterilerine en yüksek kalitede hizmeti en uygun fiyatlarla sunmayı amaçlamaktadır. Tecrübe ve uzmanlık ile birleşen titiz kalite kontrol anlayışı, her projede başarıyı garanti altına alırken, müşteri memnuniyetine odaklı yaklaşım ise ACR Metal'i güvenilir bir çözüm ortağı haline getirmektedir.

Lazer kesim ve abkant pres ihtiyaçlarınız için ACR Metal'i tercih ederek, kusursuz sonuçlar ve hızlı teslimat avantajlarından yararlanabilirsiniz.

ACR Metal, with its long-standing experience in the laser cutting and press brake sector and its expert staff, aims to offer its customers the highest quality service at the most affordable prices. The rigorous quality control approach combined with experience and expertise guarantees success at every project, while the customer satisfaction-oriented approach makes ACR Metal a reliable and trusted partner.

By choosing ACR Metal for your laser cutting and press brake needs, you can benefit from the advantages of perfect results and fast delivery.
